POSITION TITLE Intermediate Biologist

STATUS Permanent, Full Time

LOCATION Prince George, BC

About McElhanney

Based in Western Canada for over 100 years, McElhanney offers innovative and practical engineering, surveying, mapping, planning, landscape architecture, and environmental services. As a 100% employee owned and operated firm, with over 1,000 staff members, we are proud to offer qualified staff with shareholding options in our company. Our teams work hard to build strong connections with our staff, clients, and local communities.

We are solution-oriented environmental professionals focused on integrated, multi-disciplinary solutions for planning, design, permitting, construction, risk mitigation, assessment, remediation and reclamation. As recognized leaders and trusted advisors for industry, private, and municipal clients, we strive to protect ecological integrity and integrate natural assets, while balancing our clients' needs. With teams including professional, biologists, agrologists, hydrogeologists, engineers, geoscientists and other certified professionals, McElhanney has the experience to successfully provide our clients with effective and long-term environmental solutions

Role Overview

McElhanney Ltd. is seeking an experienced and motivated *Intermediate Biologist* to join our Prince George, BC office. The successful candidate will be a key member of our environmental team with the ability to draw on support from over 45 environmental professionals within the company, with a wide range of expertise. In this role, you will work on a variety of projects including baseline data collection, development of environmental protection plans, and Environmental Monitoring for large multi-disciplinary construction projects.

Responsibilities

- All stages of environmental studies from proposal preparation through data collection, interpretation, and reporting
- Coordinating permits, licenses, and approvals
- Design and implement terrestrial and aquatic habitat mitigation and compensation measures
- Mentor junior staff members of the environmental team
- Coordinate subcontracting specialties as required
- Environmental management, erosion, and sediment control design and monitoring
- Provide environmental advice and solutions to guide design and assist with planning
- Business development, and client relations
- Other duties as assigned.

Requirements

- At least 8 years of experience within a similar role
- University degree in Biology or a related field

- RP Bio. or ability to achieve designation immediately
- Experience should include proposal preparation, aquatic or terrestrial habitat assessments, environmental monitoring, permitting, and reporting
- Specialization in contaminated sites, and/or fisheries/aquatic sciences would be considered an asset
- Ability to work independently and supervise other junior members of an integrated consulting team
- Proven report writing experience and strong communication abilities
- Experience liaising with clients, First Nations, and government agencies
- Electrofishing certification and/or CPESC would be considered an asset
- Proficiency with GIS, ArcMap, mobile data collection, and/or data management would be considered an asset
- Possession of a valid BC driver's license is required at the time of hire.

If this is the opportunity for you, apply now or visit www.mcelhanney.com/careers to apply online. We thank all applicants for their interest; however, only shortlisted candidates will be contacted.
