Associated Environmental Consultants is part of the Associated Engineering Group of companies; employee-owned, and one of Canada's Best Managed Companies. We provide a wide range of environmental consulting services to a client base that is well diversified between public and private sectors. Our environmental science and management services are well integrated with those of our engineering colleagues, providing opportunities to work with talented people across disciplines and throughout western and northern Canada.

We currently have an opening for an Intermediate Terrestrial Ecologist in our Vernon office. Working with multi-disciplinary technical teams to complete environmental assessments, you will have an entrepreneurial approach and manage responsibility well. Responsibilities will include the following:

- Developing and implementing field inventory programs (e.g. vegetation, wildlife, habitat characterization) and evaluating impacts on terrestrial ecosystem values.
- Managing projects across a variety of client sectors in western and northern Canada.
- Supporting projects through municipal, provincial and federal regulatory processes.
- Developing and managing relationships with clients.
- Preparing high quality proposals and technical reports.

If you have the right background and would like to join a Platinum Club Member of Canada's Best Managed Companies Program, forward your resume and cover letter in confidence to Dave Hayward (haywardd@ae.ca) – please include the position title and location in the subject line. If you wish to be considered for other similar positions, please create an account and apply through our application system. We thank all applicants but will only contact those candidates selected for interviews.
